

# Teacher notes

Children will get a set of calculation cards, comparison cards and number cards. Children will make as many addition and subtraction comparisons as they can. For example:  $8 - 6 > 1$  ...  $8 - 6 = 2$  ...  $8 - 6 < 3$ . Children can record comparisons in their books.

## DEVELOPING

Children will work in partners and may only find one comparison per calculation.

## SECURE

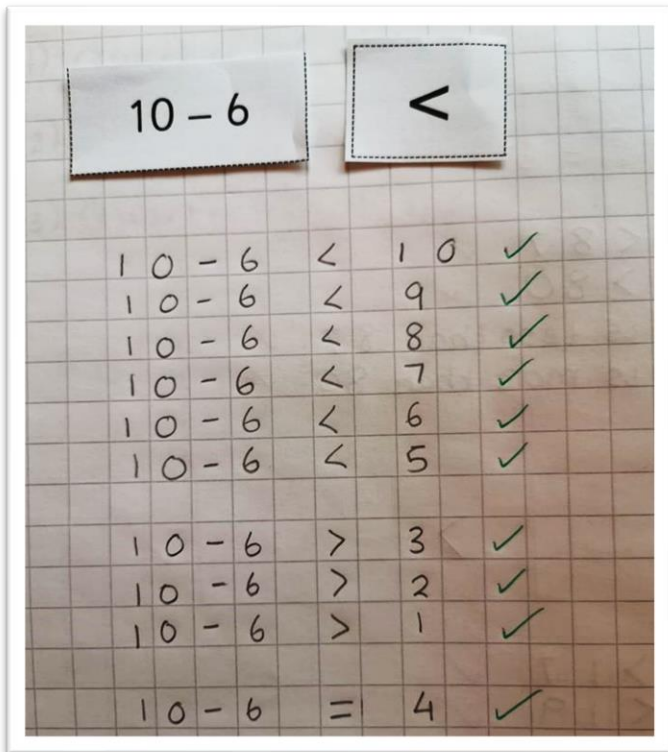

Children will work independently and find comparisons using all 3 comparison signs for each calculation.  
For example,  $2 + 6 < 9$  ...  $2 + 6 = 9$  ...  $2 + 6 > 7$

## MASTERY

Children will work independently and systematically to find all possibilities for each calculation.  
For example,  $1 + 6 < 10$  ...  $1 + 6 < 9$  ...  $1 + 6 < 8$  ... etc.

For example:

# Calculation cards

$4 + 3$

$8 - 4$

$2 + 8$

$5 - 3$

$8 + 1$

$2 + 3$

$5 + 5$

$8 - 6$

$3 - 1$

$5 + 4$

$6 - 5$

$4 + 4$

$2 + 6$

$10 - 6$

$9 + 1$

$7 - 5$

$7 - 2$

$6 + 3$

$4 - 2$

$1 + 6$

# Number cards

1	2	3	4	5	6	7	8	9	10
